### **DETAILED ACTION**

The Preliminary Amendment, filed on June 27, 2004 has been entered and is acknowledged by the Examiner.

Cancellation of claims 1-25, and 29-45 has been entered.

#### ***Specification***

On page 1 after line 5 the specification should be updated to give the current status of the cited application.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 26-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 17-19 of U.S. Patent No. 6,603,262 to Yasui et al. Although the conflicting claims are not identical, they are not patentably distinct from each other.

Art Unit: 2879

Claim 26 of the instant application essentially recites the same limitation and hence can be anticipated from claim 17 of U.S. Patent 6,603,262. Claim 17 of U.S. Patent 6,603,262 additionally recites the limitation of the second electrode part, formed using a thick film formation method which is drawn to a process of manufacturing and has not been afforded patentable weight.

Claims 27 and 28 recite the same limitations and hence can be anticipated from claims 18 and 19 respectively of U.S. Patent 6,603,262.
